Writhlington School, Bath 1994 - 2001

Apple Certified Pro - Logic Studio - 2008

Skills

I am a competent and experienced audio and video producer and musician. Through work and study I have gained detailed knowledge of sound design, audio production, music, video production and motion graphics.

I am an Apple qualified Logic Pro User and I am very familiar with the following software: MS Office, Pro Tools LE, Logic 7,8 & 9, Reason 3, Sony Vegas, Adobe After Effects, Illustrator, Media Encoder and Sorenson Squeeze. I am also very capable of adapting to new software/hardware tools.

I have been involved with Audio and Video for most of my life. Through my work as a sound engineer I have experience with front of house mixing, monitor engineering, stage management and a basic knowledge of lighting. As an Audio producer I have had the chance to use an SSL 64 channel mixing desk. I can use outboard gear effectively and am aware of the pro's and con's of using both analogue and digital in the production chain.

As a Video Producer I have worked with the Sony EX1, green screens and on location filming. I have also managed a video studio and worked as a freelancer on many projects. From working in these environments and from other walks of life I have learned to work as part of a team as well as by myself. I work well whatever the circumstances and always have a positive outlook. I am a confident person and can work pro actively under the instruction of a leader or, in turn, be a leader who can organize, control and manage tasks and situations. I am also a very creative and imaginative person and this can be heard through my music.

I have a UK Driving License.
Proficient in Mac OSX and Windows XP/Vista/7
